John Doet – FINANCIAL DATA ANALYST | QUANTITATIVE RESEARCHER

Hendon, VA I (703)853-9955 I John.doet@gmail.com

SUMMARY

Financial data analyst with experience in quantitative research, financial modeling, and data-driven risk evaluation. Skilled in Python and SQL, with expertise in analyzing market and financial data to backtest strategies, assess performance sensitivity, and evaluate portfolio risk under different market scenarios. Adept at automating analytical workflows and creating visualizations that support decision-making in portfolio and financial risk contexts.

TECHNICAL SKILLS

Programming & Analysis: Python (pandas, NumPy), SQL, VBA
Data Tools: Excel, PostgreSQL, Power BI, Snowflake, dbt
Quantitative & Data Techniques: Rolling averages, volatility tracking, data validation, automation scripting
Frameworks & Tools: Git, GitHub, Visual Studio Code

EXPERIENCE

Finance Experience

Systematic Trader & Quantitative Researcher — *Self-Directed, Remote | 06/2024 – Present*

- Performed quantitative analysis on large historical market datasets to evaluate and optimize systematic trading strategies.
- Automated data ingestion, transformation, and validation using Python, ensuring accuracy and consistency across iterations.
- Performed performance diagnostics on trading strategies, analyzing hit rates, risk/reward ratios, and parameter sensitivity to optimize models, simulating different market conditions.
- Built Python and Power BI dashboards to track trading performance, visualize cumulative returns, and monitor drawdowns.
- Identified data anomalies and assessed strategy robustness across diverse market conditions.

Financial Analyst & Investor — *Self-Directed, Remote | 09/2017 – 05/2023*

- Independently managed a diversified investment portfolio, making data-driven decisions on capital allocation and risk exposure.
- Conducted fundamental financial analysis and valuation of public equities, building models to track performance, assess trends, and support investment decisions.

Investment Banking Analyst, Mergers & Acquisitions Group — *Jefferies LLC, New York, NY | 05/2016 – 09/2017*

- Developed fully integrated financial and valuation analyses, including DCF, LBO, and merger models.
- Conducted extensive business and financial due diligence to support timely execution of sell-side transactions.
- Automated portions of the due diligence data preparation process using Excel VBA, streamlining repetitive tasks for M&A transaction data room setup.

Engineering Experience

Data Engineering Consultant — *Aclaimant, Remote | 04/2024 – 06/2024*

- Built and maintained SQL- and Python-based data pipelines, executing validation, transformation, and quality assurance scripts to ensure dataset accuracy and completeness, while collaborating with technical and business teams to align data structures with analytical objectives.

Software Engineering Program — *Thinkful, Remote | 05/2023 – 10/2023*

- Completed full-stack curriculum using React, Node.js, PostgreSQL, REST APIs, and JavaScript.
- Developed mobile-first applications with interactive dashboards, emphasizing clean data handling and usability.

EDUCATION

Thinkful — *Certificate, Software Engineering | 10/2023, Remote*
Miami University; Farmer School of Business — *BBA: Finance | 3.91 GPA | Summa Cum Laude | 05/2016*
