Summary

Experienced Voice Engineer with 12+ years in VoIP, PBX, SIP trunking, and unified communications solutions. Adept at designing, implementing, and troubleshooting advanced voice communication systems, ensuring high-quality, reliable, and efficient voice services. Skilled in call routing, IVR, QoS optimization, network fundamentals, and vendor collaboration, with a proven record of enhancing system performance and project management in on-premises and cloud-based environments. Proven expertise in managing the Avaya Aura suite,and Session Border Controllers. Available for after-hours and weekend on-call support.

Skills

- **Management and Leadership**: Team management, motivation, training, strategic thinking, project management
- **Technical Expertise**: AVAYA solutions, SIP trunking, Oracle SBC, fraud detection, voice security protocols, Python programming, Microsoft Azure, Google Cloud, cybersecurity, Windows Server, Linux Red Hat, ServiceNow, BMC Remedy.
- **Communication**: Public speaking, academic research, Arabic-English translation
- **Voice Communication Protocols**: SIP, H.323, ISDN PRI, VoIP
- **Voice Systems**: Nortel CS1000, Avaya PBX, Webex Calling, MS Teams Voice, Zoom, Contact Center Infrastructure

Work Experience

AFAQ Initiative **Aug 2023 - Oct 2024**
Instructor, Engineer *Amman Jordan*

•Collaborated closely with the founder of the AFAQ Initiative to provide IT consultation and design communication strategies.
•Delivered engaging workshops focused on:
•Task management using Slack, enhancing team collaboration and productivity.
•Delivered cybersecurity awareness workshops, improving organizational security practices and reducing security incidents
•The use of AI in project management to drive efficiency.

Freelancing **2020 - 2023**
Freelance IT &Telecom Consultant *Ammn Jordan*

- Worked on projects including:
- Cloud data solutions, optimizing performance and scalability.
- Utilized ITSM platforms (ServiceNow, Remedy) to manage incidents, changes, and knowledge documentation
- Delivered Nortel voice solutions, cloud data optimization, and security policies.
- Deployed SBCs (Session Border Controllers) to secure SIP Trunking, enable topology hiding, encrypt signaling/media, and prevent toll fraud.
- Implemented fraud prevention measures such as Class of Service (COS), barring codes, and ARS restrictions to block unauthorized international/premium-rate calls.
- Implemented and managed CS1000, Legacy/Avaya, and Call Center Infrastructure, enhancing system reliability and reducing downtime
- Worked with Nortel IPT voice infrastructure networking and interrelated components, improving communication efficiency and system integration
- Managed voice mail systems, Blackberry, and aspect/contact center systems, ensuring seamless communication and user satisfaction
- Managed the Avaya Aura suite of products, including Communication Manager (CM), Application Enablement Services (AES), System Manager (SMGR), Session Manager (SM), Session Border Controller (Client), and Messaging, which improved system functionality and user experience
- Provided solutions for call recording technology and performance monitoring, enhancing data accuracy and operational efficiency
- Managed call routing policies to reduce fraudulent call attempts, saving costs and maintaining high communication integrity.
- Researched and translated technical IT materials.
- Administered Windows Server setup and maintenance, ensuring STIG compliance and security configuration, which enhanced system security and reliability
- Performed infrastructure patching and maintenance activities to ensure a secure and stable telephony environment.
- Integrated call recording and callback technologies and reporting tools to enhance customer experience and operational visibility.

Freelancing **Sep 2020 - Dec 2020**
Research Assistant *Amman Jordan*
Assisted a professor in researching and translating articles.

IRAP **Apr 2017 - Jan 2020**
Researcher / Translator / Fact Checker *Amman, Jordan*
Conducted fact-checking, translation, and research of Iraqi documents.

METCO **Jul 2015 - Apr 2016**
IT Project Coordinator *Zain Iraq, Baghdad, Iraq*

- Managed the transition of Zain Iraq Call Center from Nortel to AVAYA systems, ensuring seamless integration and improved system reliability
- Led Contact Center Call Routing, IVR, and voice performance management, enhancing customer service efficiency and reducing call handling time
- Coordinated with Avaya on system upgrades, migrations, and vulnerability remediation.
- Applied ITIL processes, process flows, and definitions to streamline project workflows, resulting in improved project delivery times and enhanced team collaboration
- Built and interpreted Avaya CMS reports to optimize agent performance and call center KPIs.
- Managed IVR, call routing (vectors, VDNs, skills), and performance monitoring, reducing call handling time and improving customer satisfaction

METCO **Sep 2009 - Jul 2015**
Project Engineer *Baghdad, Erbi, Basrah, Kuwait*

- Installed and configured communication platforms and GSM GW at the General Electric Baghdad head office, enhancing communication efficiency
- Managed the installation and configuration of IPO and GSM GW at the Ashur Scientific Office, improving system reliability and performance
- Contributed to the JV Basra IPO 2N GSM GW project by assisting in the design and implementation, leading to improved project outcomes
- Led the upgrade of Zain Iraq Call Center to CS1k 7.5 AACC 6.3, incorporating Call Parrot for Engage Recording, which enhanced call recording capabilities and customer service
- Installed, configured, and provided technical support for AA CM ACR and GSM GW at Standard Chartered Bank Baghdad and Erbil offices, ensuring seamless communication and operational efficiency
- Supported installation, configuration, and maintenance of IPO 2N GSM GW at Alyasra Food Company, ensuring seamless communication operations
- Provided second-level support for Zain Iraq Call Center, improving issue resolution efficiency and customer satisfaction
- Installed, configured, and supported Nortel CS1000 systems, ensuring optimal performance and minimal downtime
- Facilitated session manager routing and SIP-based communications, improving call quality and system efficiency
- Troubleshot and implemented PBX features and Call Center systems, improving system reliability and user satisfaction
- Conducted protocol operations involving H.323 and SIP, ensuring secure and efficient voice communication
- Administered identity and root certificates across UC platforms to maintain secure communications.
- Deployed Session Border Controllers (SBCs) to protect communication systems from cyberattacks, ensuring secure SIP trunking and topology hiding.
- Troubleshot SIP, H.323, and ISDN PRI call flows, ensuring interoperability and high-quality voice services.

Education

University of Technology, Baghdad, Iraq
Bachelor of Engineering, Laser and Optoelectronics

Certifications & Training

- **Avaya Communication Manager (CM) Core Implementation:** Avaya Global Learning
- **Avaya IP Office administration:** Avaya Global Learning
- **CM, AES, CMS, AAEP, AIC:** NextBridge IT solutions.
